

PROVING PIG

The Pipe Equipment Specialists Proving Pig is used to prove that the internal dimensions of a pipe do not fall below a minimum diameter, or that the pipe has a circular profile. The Proving Pig is simply pulled through the pipe or duct.

The Proving Pig is supplied with a towing eye at both ends so that a rope may be pulled in at the same time to allow the pig to be retracted if necessary, or to act as a cable draw cord.

Each Proving Pig is designed and manufactured to meet the customers exact specifications, and the discs can be supplied in a range of different materials including Mild Steel, Aluminium and Stainless Steel (to resist corrosion due to chemical attack).

MAJOR FEATURES

- Simple and quick to use
- Extremely robust
- Saves time checking pipe dimensions manually
- Fully Re-usable
- Manufactured to customer requirements
- Available in a range of materials including Aluminium, and Stainless Steel

The company follow a policy of continuous product development and as such reserves the right to make alterations to equipment and techniques without prior notice.
